## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, drawn to a data communication system, classified in class 455, subclass 556.1.
  - II. Claims 5-8, drawn to a connector cable, classified in class 455, subclass 559.
  - III. Claims 9-10, drawn to a communication adapter medium, classified in class 455, subclass 557.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention I is claimed as a whole data communication transmission system. The subcombinations have separate utilities such as invention II is used to connect one device to another, and invention III is used to insert into a computer for data transmission.
